Technical Protocol 2  
Test results of measuring the parameters of internal combustion engine on  
"KAMAZ" License Plate 03-08 XAЧ  
treated by XADO-Technology

This protocol confirms that specialists of "XADO" Corporation conducted repair-restoration procedure on internal combustion engine of truck "KAMAZ", license plate 03-08 XAЧ (December 2000).

Fuel consumption tests were conducted before and after XADO treatment.

Before XADO treatment engine consumed 500 g of fuel in 6 min 30 sec. at temperature 40°C and 1000 rpm.

After XADO treatment engine consumed 500 g of fuel in 7 min 52 sec. at temperature 40°C and 1000 rpm.

Financial effect is 21.02%
